

Monrovia Consolidated School System (MCSS)

MCSS Personnel and Credential Verification Report

**Conducted by the
Civil Service Agency**

May 27, 2025

Foreword

This Personnel and Credential Verification Report presents the findings of a one-month verification exercise conducted by the Civil Service Agency (CSA) in collaboration with the Ministries of Education and Finance & Development Planning. The initiative followed a public protest staged by students of the Monrovia Consolidated School System (MCSS), who called for the formal employment of long-serving volunteers in their schools. In response to this urgent call, the CSA promptly mobilized resources to undertake this joint verification intervention, recognizing the need to establish order, transparency, and accountability in the education workforce.

The report provides a detailed overview of human resource data across the MCSS, including employment status, credential validation, gender distribution, and key HR indicators such as age demographics, staff on study or sick leave, retirement status, and the distinction between verified and unverified personnel. These data points are critical for strengthening institutional workforce planning, ensuring merit-based employment, and aligning staff qualifications with the delivery of quality public education services. Additionally, the report offers insights into gaps that require urgent administrative attention by the relevant authorities.

It is anticipated that the leadership of the MCSS will work closely with the Civil Service Agency to implement the recommendations and take corrective actions where necessary. This partnership will be pivotal in promoting workforce regularization, improving service delivery, and reinforcing the Government of Liberia's commitment to reforming the public education sector for long-term sustainability and national development.

Josiah F. Joekai, Jr., Ph.D.
Director-General
Civil Service Agency, Republic of Liberia

Introduction

The Monrovia Consolidated School System (MCSS) provides primary and secondary education to the population of the city of Monrovia metropolitan area. A Memorandum of Understanding (MOU) signed on 28 February 1963 led to the preliminary step of the formation of the system. However, the MCSS was established by government charter in 1964 under the *Act to Amend the Education Law to Create the Monrovia Consolidated School System*. Prior to the creation of the MCSS, schools in Monrovia were individually administered by principals reporting directly to the Ministry of Education.

Since the establishment of the MCSS about 61 years ago, there were no volunteers until 2018. Eventhough volunteers were being considered as of 2018, their status was not regularized as fulltime staff within the school system. Interestingly, the assignment of staff at MCSS schools depends on the number of students enrolled at a particular institution. The inability of the system to regularize the volunteers for a protracted period affected students' learning at the various institutions which led students of the system to engage in protest actions in the streets of Monrovia, advocating for the volunteers to be hired. This led to the destruction of properties, manhandling of some students, and the subsequent disruption of academic activities across the city.

Currently, the MCSS has over five hundred (500) volunteers and nine hundred (900) regular employees of the school system as reported by MCSS. To address the status of volunteers as raised by students, the Government of Liberia through the Ministries of Education (MoE), Finance & Development Planning (MFDP) and the Civil Service Agency (CSA) intervened to settle the crisis by determining the actual number of volunteers at each school. These volunteers comprise Teachers (591), caretakers (60), Security officers (45), Librarians (7), and Guidance Counsellors (15).

Consistent with the decision of MOE, MFDP, and the CSA, the CSA embarked on a one-month personnel and credential verification for all MCSS schools. This exercise sought to inform stakeholders in the educational sector and policymakers as to the actual numbers of volunteers and employees within the system with the requisite qualifications to perform the tasks assigned.

Methodology of the Personnel and Credential Verification

The methodology employed during the execution of the personnel and credential verification exercise at the MCSS is the CSA Employee Status Regularization Project (ESRP) digital application, a standardized system developed and used by the CSA. Prior to the commencement of the personnel and credentials verification, the CSA received Volunteer listing, number of Employees per schools, listing of Study leave, and sick leave.

The CSA divided the 27 schools into three zone. **Zone-I:** Tubman High School, Mary Brownell, A. Glen Jr. High School, Gaye Town Public School, Rebecca Wilson Community Elementary, Matadi Community School, and Pipeline Junior & Senior High School. **Zone-II:** G.W. Gibson high school, Monrovia Central high, CDB King Elementary school, Monrovia Elementary Demonstration School, Lorma Quarter Elementary School, C William Brumskine Elementary School, Slipway Elementary School, Rebecca J. Wilson, Matilda Newport Junior High School, and N. V. Massaquoi Elementary School. **Zone III:** D. Tweh Memorial High School, Emmanuel W. Johnson Junior High School, Point Four Elementary School, Botswain Junior & Senior School, Abendu Bentsi Elementary Junior & Senior High School, Moses K. Weefur Elementary School, Marvii Sonii Elementary & Junior High School, St. Paul Bridge Elementary & Junior High School, and Allen Bryant elementary & Junior High School.

Both employees and volunteers were made to sign a consent form to guarantee the documents presented were authentic. This approach further assured volunteers and employees of confidentiality, data protection and their participation.

The CSA team received at least four credentials in various Categories-Certificate, Diploma, Associate, Bachelors, Masters, and Ph.D. were applicable. The Team subsequently received and validated all credential as well as National Identification Cards.

The Scope and Goal of the Personnel and Credential Verification

The exercise covered the 27 MCSS schools, capturing 604 volunteers and 958 employees as reported by MCSS. The overarching goal was to establish the legitimacy of employees and volunteers, as well as their academic qualifications. The 27 schools are distributed across Central Monrovia, Gardnerville, Paynesville, and Bushrod Island (**see table 1**).

Names of Schools Disaggregated by Employees, Volunteers, and Gender

This section of the report provides information on the outcome of the personnel and credential verification exercise conducted across the 27 schools. The analysis focused on two key categories of personnel: Employees and Volunteers. We carefully compared the figures of 958 employees and 604 volunteers reported by the MCSS with those processed during the exercise. The report provides additional insights based on gender representation, academic qualification, study leave, sick leave, and pension/retirement.

The CSA team verified 704 employees (**see annex 1**) which shows a difference of 254 employees not seen. The variances represent the difference between the data received from MCSS to the data obtained from the exercise conducted by CSA. The negative variance of (-1) recorded at Mary Brownell JR High school shows that the total number of employees presented by the MCSS authority was less than the total number of employees processed by the CSA team at that school, which has reduced the 254 to 253 employees.

The volunteer data received from MCSS showed 604 persons are volunteering at the MCSS, (**see annex 2**). Of the 604 received, the CSA team analyzed the list and set aside repeated names of some volunteers, which reduced the number from 604 to 597 (**see annex 3**) with a difference of 7 (**See annex 4**). The CSA team verified 459 volunteers during the exercise (**see annex 5**). This represents a variance of 145 volunteers who did not participate in the personnel and credential verification exercise, (**see Table 11**). The report also reveals that out of the total number of volunteers processed by the CSA team, 314 were male, while 145 were female (**see table 2**)

Employees Enumerated, disaggregated by Qualification for Schools Processed

This section presents the educational qualifications of employees across 27 MCSS schools, categorized by gender and academic level (Ph.D., Master's, Bachelor's, Associate, High School Diploma, and Certificate). Accordingly, this report shows that the CSA team processed 704 employees. Of the total MCSS employees processed, no PhD holder was recorded. However, 44 employees presented a master's degree, of which 10 were females, while 34 were male. The report also shows that 335 employees presented a bachelor's degree, of which 127 were females, while 208 were males. Furthermore, the report reveals that 88 employees presented associate's degree, of this number, 20 were females, while 68 were males respectively. The report further shows that 317 employees presented a high school diploma. For the gender distribution for those who presented high school diploma, 104 were females, and 213 were males.

The last category of credentials considered in this report are those employees with certificates. The report reveals that 227 employees of the MCSS presented certificates, of this number, 64 employees were females, while 163 employees were males. **(see table 3)**

Volunteers Enumerated, disaggregated by Qualification for The Mcss Schools Processed

This section represents the educational qualifications of volunteers across 27 MCSS schools, categorized by gender and academic level (Ph.D., Master's, Bachelor's, Associate, High School Diploma, and Certificate). The MCSS authority provided names of 604 volunteers, but the report shows that 459 volunteers were processed by the CSA team. In addition, the report shows that 10 volunteers have a master's degree. For the gender distribution of the master's degree holders, 1 female was recorded, while 9 males were recorded. The report also shows that 211 volunteers presented a bachelor's degree, disaggregating by gender, 65 were females, while 146 were males. Furthermore, the report reveals that 52 volunteers presented an associate's degree, of this number, 17 were females, while 35 were males. In furtherance, the verification reveals that 130 volunteers presented a high school diploma to the CSA team during the exercise, of which 51 were female, while 79 were male. The last category of credentials considered in this report are those volunteers with certificates. The report reveals that 77 volunteers of the MCSS presented certificates. For the gender distribution of this number, 37 were female, while 40 were male. **(see table 3-A)**

Employees and Volunteers Without Credentials, Disaggregated by Gender and Schools.

The report showed detailed statistics on employees and volunteers without qualifications across the 27 schools within the Monrovia Consolidated School System (MCSS). The data is categorized by employees, volunteers, and gender. The report shows that 62 employees did not present any form of credentials during the verification process. Of this number, 27 were females, while 35 were males. On the other hand, we report that 61 volunteers did not present any form of academic credentials to the CSA team. Disaggregating by gender, 30 were females, while 31 were males. It is important to note that the verification revealed that the volunteers and employees in this category are caretakers, securities, etc. **(see table 4)**

Employees and Volunteers with Degrees in Religious Education

The report reveals the list of employees and volunteers who presented academic credentials in theology and associated disciplines in religious studies during the exercise. The report shows that a total of 19 staffs submitted academic qualifications in theology and associated disciplines, but they are serving in capacities at various schools not related to their academic qualification. From this total, 6 were volunteers — 5 males and 1 female, and 13 of the remaining staff in this category were employees. Among the employees, there were 12 males and only 1 female. **(see table 5)**

Employees on Study Leave

A total of 20 staff members of the MCSS were granted study leave to pursue academic programs both domestically and internationally for one to three years. Of the twenty (20) staff in this category, thirteen (13) are on a government of Liberia-sponsored scholarship in India, while the remaining seven (7) are privately sponsored locally & internationally. Interestingly, these individuals are still maintained on the Government of Liberia (GOL) payroll, receiving full salaries, contrary to the provisions of the **Civil Service Revised Standing Orders, Section 7.2.5**, which restricts full salary payments to individuals on study leave after six months.

Furthermore, the analysis revealed significant disparities between the academic disciplines pursued and the functional mandate of MCSS, which primarily operates elementary, junior & senior high

schools. Of the 20 staff, only one individual is pursuing a degree in primary education as reported by MCSS to the CSA team, a field directly relevant to classroom instruction within the Liberian education system. Secondly, a substantial portion of the scholarship students are enrolled in disciplines ranging from clinical research programs, statistics, microbiology, environmental science, economics, pharmacy, engineering, and general medicine—fields that do not align directly with high school curriculum requirements of the MCSS. In addition, two individuals are pursuing unspecified MBA programs whose applicability to MCSS's instructional needs is unclear. Consequently, this mismatch signals a high probability of functional dislocation upon the return of these individuals, particularly as their new qualifications may not translate into teaching roles. Given that MCSS junior & senior high schools do not offer tertiary-level or highly specialized curricula, it is unlikely that most of these returnees will re-assume classroom positions or contribute effectively to secondary education delivery **(see table 6)**.

Summary of The MCSS Staff on Study Leave and The Programs Being Studied

1. One person studying master in primary education. (MPE)
2. Three persons studying Micro-Biology (MB)
3. Two persons studying Master in Business Administration (MBA)
4. One studying master in Economic (MA)
5. Six persons studying Clinical Research. (MSC)
6. Three studying statistic (MS)
7. One each studying Pharmacy, General medicine, environmental science, and power system engineering.

However, except for one staff who is studying primary education, we are not sure whether the 19 individuals' field of study are relevant to the operations of the school system. For example, six individuals are studying clinical research, two in microbiology, general medicine, etc.

Volunteers from The Mcss School System Who Names Are Also On the Payroll of the Ministry of Education.

The personnel and credential verification revealed that 3 volunteers on the list received from the MCSS and processed during the exercise are also currently active on the most recent payroll of the Ministry of Education. **(see table 7)**

Employees On Medical Leave

As per the submission from MCSS, six (6) employees are reported to be on sick leave, but MCSS submitted documentation for five (5). There is no hospital documentation evidence, however to authenticate the reasons for the medical leave, except the form indicating departure time. **(see table 8)**

Names of Staff That Have Reached The Retirement Age Range

The report shows that 41 employees of the MCSS have reached the retirement age range (60-67) while volunteers (60-69) also form part of that category respectively. Among the 41 permanent employees, 29 are male, and 12 are female. On the other hand, from the total number of volunteer staff to be pensioned, 4 are male, and 2 are female. **(see tables 9 & 9 A)**

CONCLUSION

The personnel and credential verification exercise conducted across the 27 schools has shown significant problems affecting the efficiency and productivity of the MCSS. Of the 958 employees and 604 volunteers reported by MCSS, 704 employees and 459 volunteers were confirmed by the CSA. This disparity draws attention to issues with responsibility, record-keeping, and attendance. The results also revealed that some individuals working in classrooms either lack formal teacher training or hold degrees in subjects unrelated to the primary requirements of the school system. According to the report, most of the 20 MCSS employees on study leave are now working on degrees in disciplines unrelated to secondary education. While education is a right to every child, this mismatch suggests that many of the people on study leave would struggle to get back into the system as their respective areas of discipline do not align with the needs and preferences of the MCSS. Considering the twenty (20) employees currently on study leave doing degrees unrelated to MCSS, a thorough relook is needed in offering future scholarship programs.

Also, individuals on medical leaves need proper documentation as excuses provided for staff on sick leaves were not well documented. These challenges show how urgently MCSS must engage closely with CSA and other stakeholders to improve its human resource practices, ensure data accuracy, and ensure that employees' credentials meet system standards. Facing these difficulties head-on is essential for rebuilding trust, improving teaching standards, and creating a school environment where both teachers and students can grow.

RECOMMENDATIONS

1. That the MCSS should have a well organize database on their employees for ease of reference.
2. That the 3 individuals that are on the MoE payroll but volunteering at MCSS be further investigated on their actual status.
3. That the 19 Individuals in the classroom with theological academic qualification be reclassified.
4. That the 6 volunteers that have reached retirement age should not be hired, while the 41 employees who have reached retirement be retired honorably.
5. That the CSA Standing Orders Section 7.2.5 be applied to all 20 scholarship recipients.
6. That the MCSS provide to the CSA the Memorandum of Understanding (MoU) signed between MCSS and the 20 scholarship recipients, copies of admission letter, and current grade sheets.
7. We encourage the MCSS authorities to conduct regular refresher training workshops for employees;
8. The GOL should take the appropriate actions to resolve the 459 volunteer issues.
9. That the 253 no-show employees and 138 volunteers be immediately deleted if the MCSS administration cannot identify them for processing;
10. That the MCSS discourage volunteerism at their twenty-seven schools to avoid a repeat of the crisis;
11. That the MCSS awarding of scholarship be more relevant to the system operations than individual driven.
